

HYPERACUTE STROKE-SS

Hyperacute Stroke Medical Emergency Team (MET) - SS

REMINDER: MET RN to notify MD to initiate appropriate inpatient stroke order set

REMINDER: Confirm Last Seen Normal, ACTIVATE CODE STROKE if Last Seen Normal is < 6 hours

NURSING

- ☒ Initiate Full NIH Stroke Scale STAT
- ☒ Perform Abbreviated NIH Stroke Scale: Q 15 minutes x4, Q 30 minutes x12, Q1 Hr x16
- ☒ Vital signs other than routine: Q 15 minutes x4, Q 30 minutes x12, Q1 Hr x16
- ☒ Insert 2 large bore IVs if not present. One must be at least 18 gauge
- ☒ Blood glucose monitoring (BGM) x 1 STAT
- ☒ Notify MD of neuro changes: (Prepare for STAT CT of brain without contrast)
 - worsening headache
 - change in level of consciousness
 - unexplained vomiting
 - change in pupil size/reactivity
 - increased agitation
- ☒ Apply telemetry monitoring
- ☐ May leave floor without telemetry

RESPIRATORY

- ☒ Apply oxygen (O2) with defined parameters: 2 L/min via nasal cannula to maintain oxygen saturation $\geq 92\%$

NUTRITION

- ☒ NPO

BLOOD BANK

- ☐ Type and Screen - STAT

LABORATORY - Cardiac Markers

- ☐ Cardiac Enzymes w/ Troponin/Myoglobin - STAT

LABORATORY - Hematology

- ☐ Complete Blood Count (CBC) - STAT

LABORATORY – Chemistry

- ☐ Basic Metabolic Panel (BMP) - STAT

LABORATORY – Coagulation

- ☐ Prothrombin Time (PT/INR) - STAT
- ☐ Partial Thromboplastin Time (aPTT) - STAT

DIAGNOSTICS - Cardiology

- ☒ 12 lead Electrocardiogram (EKG) - STAT Reason for exam: Hyperacute Stroke

DIAGNOSTICS - Radiology

- ☐ Portable Chest X-ray – STAT; Reason for exam: Hyperacute Stroke

DIAGNOSTICS - CT

- ☒ CT Brain without contrast – STAT; Reason for exam: Hyperacute Stroke
